

Are you interested in Bonsai?

"They say that consistency is the key to success"
Staselwood knows this to be true, and is now offering you
your very own copy of that key.

This course was designed to strengthen your knowledge for creating "master produced vs. mass produced" bonsai. One Fee will get you a full year of professional training to help lead you through the seasons and progressions of your Bonsai stock. Learn the right techniques and when to use them. No more guessing or trying to interpret from books and videos. Learn species specific techniques with hands on repetition, classroom instruction, and personalized supervision.

This instructional series will consist of 6 bi-monthly day long classes throughout the year with reminder instructions in between sessions. This will be a small class of only 6 or 8 students, giving you plenty of personalized instruction time to work on bonsai from our studio, or you may choose to bring your own material for refinement. Each class will have specific milestones for you to complete, working both in class and on your own.

"Reduce your Learning Curve by Taking this Year Long Learning Series"
